DiamondShield™: Featuring 10 sizes
ranging from 6x6x4 to 20x16x10 inches...
and encompassing more than 150
configuration opportunities...

DiamondShield™ meets or exceeds all
applicable IEC, NEMA, UL and CSA ratings...
to UL/NEMA 4X, IEC IP 66.

DiamondShield™ Fiberglass Electrical Enclosures

Unique. Reliable. Flexible. Revolutionary.

It's What You Want It To Be!

Just imagine ... an enclosure system that truly can be what you want...and need...it to be! Today, that enclosure system is a reality...with **DiamondShield™**, from Stahlin Non-Metallic Enclosures.

The revolutionary design of **DiamondShield™** provides a one-of-a-kind enclosure architecture that can range from "bare bones" basic yet durable simplicity to a highly customized, sophisticated protective structure.

Go From This!

To This!

What REALLY Makes DiamondShield™ Different?

Featuring 10 sizes ranging from 6x6x4 to 20x16x10 inches... and encompassing more than 150 configuration opportunities... **DiamondShield™** differentiates itself from all other available enclosure options because of its:

- Proprietary material featuring Patent Pending Double Protection SolarGuard™.
- Patent pending, revolutionary design concept.
- Interchangeable, non-penetrating hardware including covers...hinges...latches..
- Remarkable "No Limits" Panel Management System™.
- Clean, contemporary appearance combined with rugged, reliable performance.

Attractive Aesthetics....No Penetrating Hardware...Tongue & Groove Gasketing...Interchangeable Hardware...Interchangeable Covers...Revolutionary Panel Management System™.

The pioneering design of **DiamondShield™** allows for maximum flexibility in the use of the enclosure...every cubic inch of the interior volume is easily available and thoroughly protected!

DiamondShield™ meets or exceeds all applicable IEC, NEMA, UL and CSA ratings... to UL/NEMA 4X, IEC IP 66.

Want more good news?

DiamondShield™ is highly cost-competitive with all other major non-metallic and metallic alternatives such as stainless steel, aluminum and carbon steel.

Interchangeable Covers

With **DiamondShield™** you get more...you don't pay more! Plus... you only pay for what you want. That's flexibility working for you not against you. Why pay for something you don't need?

Beautiful Design

No Penetrating Hardware

Panel Management

Stahlin's Revolutionary Panel Management System™

CP 1210 AL

BP1210 AL (or SS, FG, CS)

P 1210 ASAL

P 1210 STAL

P 1210 SWAL

A variety of panel systems allow use of every cubic inch inside the enclosure, even panels that mount to the inside of the cover!

DiamondShield™ Starts With The Material Difference Of SolarGuard™

All **DiamondShield™** products are American-made...molded at Stahlin's world-class production facility in Belding Michigan. **DiamondShield™** enclosures feature Stahlin's proprietary, patent pending double protection fiberglass formulation: SolarGuard™ developed in Stahlin's advanced FormRight Labs.

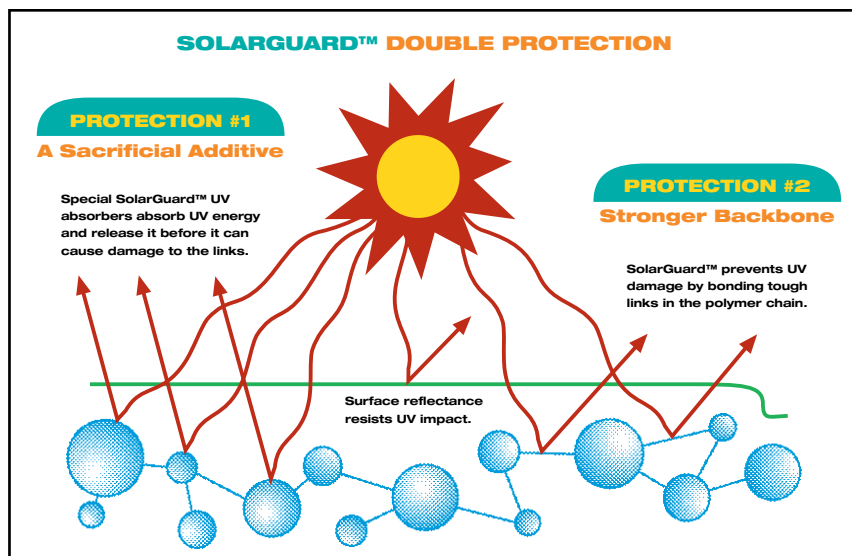

In independent third party comparison testing, SolarGuard™ outperformed other available SMC formulations by as much as 60% in its ability to retain gloss and color after exposure to concentrated UV light.

SolarGuard™ meets a NFPA No. 101 Class A flame spread index. Not only does SolarGuard™ meet UL 94 V0, but it also passes and is certified to UL 94 5V for exceptional fire retardancy.

How does SolarGuard™ do what it does?

Because of its chemical composition and special additives, SolarGuard™ is able to reduce the effects of UV degradation such as surface roughening and fiber blooming. This new proprietary SMC formulation technology significantly enhances the molecular bond strength and crosslinking that occur during the curing process. The result? An unsurpassed resistance to polymer degradation achieved by making it much more difficult for UV energy to attack molecular bonds of both primary chains and crosslinks.

SolarGuard™ provides a second layer of protection thereby giving you "double protection" through the use of a proprietary sacrificial additive that acts as a UV absorber.

No other available enclosure brings you this level of UL 94 5V fire retardancy combined with significantly improved weathering, UV resistance, chemical resistance and safe, durable performance...all without adding cost to Stahlin's new **DiamondShield™** electrical enclosures!

The Design Difference Of DiamondShield™... Proof Through Performance.

DiamondShield™ is not just a pretty new face.

DiamondShield™ is, quite simply, the single best non-metallic enclosure choice for protection against chemical, temperature and other corrosive attacks.

*How does **DiamondShield™** achieve this high magnitude of functionality?*

The Design Difference #1... Unobstructed Walls

First: DiamondShield™ provides unobstructed side walls with an open face (no flange) coupled with a hinge and latch system that doesn't protrude through the walls. In other words...non-penetrating hardware that eliminates the risk of compromising protection due to side penetrating rivets or screws for external hinges and/or latching. Among the many benefits to you:

- Maximized opening for panel installation and hand assembly within the enclosure.
- Minimized obstructions for assembly and maximized ease of use to insure that conduit can be connected at any point on the sidewall, or that ancillary devices such as alarms, sensors or lights can be mounted in required positions.
- Minimized gap areas for the accumulation of particulate... critical in applications such as food processing, chemical processing or general wash down areas.
- Integral hinge and secured latches do not penetrate through the enclosure side walls thus not providing for a potential leak path.

The Design Difference #2... Tongue & Groove Gasketing

Second: DiamondShield™ features a tongue & groove, two-part urethane gasketing system. Robotically applied to ensure accuracy and consistency, our gaskets stubbornly maintain the integrity of all **DiamondShield™** enclosures. These seamless gaskets possess extremely high memory resulting in negligible compression set.

The Design Difference #3...

Interchangeable Covers & Hardware

Third: DiamondShield™ brings you the extreme flexibility of field interchangeable covers and hardware.

DiamondShield™ Cover Options (P/N Prefix):

- Opaque (DS)
- Flush Bonded Viewing Window (DSW)
- Clear Cover (DSCC)
- Custom

Latching (P/N Suffix):

- Screw (W, HW)
- Hinged Cover With Link Lock Latches (HLL)
- Hinge Cover With Pull Latches (HPL)
- Hinged Cover With Fiberglass/Stainless Steel Bail Wire Latch (FHL)

The Exceptional Architectural Freedom of DiamondShield™ Brings You These Many Benefits:

COVERS:

- Maximized ease-of-application and field use of **DiamondShield™**.
- Ease of separation of cover & base to allow for machining and modifications.
- No need to match a specific cover to a unique base.
- Capability of replacing cover or exchanging to a clear cover from an opaque cover.

LATCHES:

- Promotes ease of use resulting in labor reduction and cost savings.
- Stainless steel latches are padlockable for increased safety.
- Promotes end user's choice of addressing the manner of cover opening for security applications, allows a quick conversion from screw cover to lock-out cover.
- Restricts entry into enclosure to qualified personnel minimizes areas for particulate accumulation, softens visual lines, promotes absorption of shape into end user's custom design.

The Design Difference #4...

Unsurpassed Panel Management System™

Fourth: Stahlin's innovative "No-Limits" Panel Management System™ enables **DiamondShield™** users to take maximum advantage of ALL enclosure space...including the inside of the cover!

- Back Panel
- Variable Height Stationary Panel
- Variable Height Swing Panel
- Dead Front Swing Panel
- Cover Panel
- Multiple Panels

The Pioneering Panel Management System™ of DiamondShield™ Brings You These Many Benefits:

- Full utilization of both space and design. All space within the enclosure can be accessed and utilized with minimal requirements for additional mounting hardware.
- Panel maneuverability at both the time of assembly and in actual field use.
- Optimized use and function of all usable space within the enclosure while assisting in the mounting of cover mounted devices, such as touchpads and printed circuit boards.
- Maximized visibility of panels that offer critical feedback, such as instrumentation, while preserving the integrity of the enclosure.
- Ability to meet unique visual requirements usually associated with a dead front panel.
- Ability to meet the needs for mounting surface at rear of enclosure.
- Ability to meet end users' design capabilities and field changes that would otherwise require major modification or costly disassembly.
- Ability to externally assemble, then "drop in" to the enclosure DIN rail mounted components, thereby minimizing assembly, modification and field servicing.
- Maximum surface area for pushbutton or touchpad layout. Maximizes end users' design possibilities.
- Ability to meet end users' requirements for the installation of isolated visibility or custom visual requirements.
- Offers restricted access to areas of adjustment and calibration.

DiamondShield™ Panel Management System™ (Part Number)

BACK PANEL (BP)

BP1210AL

- Traditional sized back panel
- Common industry mounting footprint
- Wide choice of material

DEAD FRONT SWING PANEL (SWAL)

P1210SWAL

- Mounts at the front of the enclosure
- Larger surface area when compared to the variable height swing panel
- Hinged on one side, secured to the other
- Used in conjunction with corner mounting posts

VARIABLE HEIGHT STATIONARY PANEL (STAL)

P1210STAL

- Mounts at any height in the enclosure base including as back panel or use as a top stationary dead front panel
- Larger panel area than traditional back panels maximizes surface mounting area
- Used in conjunction with corner mounting posts

VARIABLE HEIGHT SWING PANEL (ASAL)

P1210ASAL

- Mounts at any height in the enclosure base
- Hinged on one side, secured to the other
- Used in conjunction with corner mounting posts

COVER PANEL (CP)

CP1210AL

- Stationary panel that mounts to the inside on the enclosure cover.

USE MULTIPLE PANELS

The Design Difference #5... Mounting Versatility

Fifth: DiamondShield™ provides these options for mounting:

- Brass inserts allow mount of an enclosure to any flat surface with a through hole or to any strut system.
- Optional mounting Feet (DSMGFTKIT)

Optional Mounting Feet

Flush Threaded Insert

Installed Mounting Foot

Strut Mount

DiamondShield™ Series - Interchangeability Options

Other features of DiamondShield™ flexibility for in-the-field time and cost savings:

- Ease of changing or replacing covers.
- Ease of changing locks.
- Flexibility for adding panels "down-the-road."

Cover Options

Hinged Cover with Screw Down Securing
HW Configuration

Fiberglass and Bail
Wire Latch

The Difference Of Proof Through Performance

Tougher Than Thermoplastics!

Right Reason #1: Corrosion Resistance

- Stahlin's fiberglass provides better acidic and alkaline-based environmental corrosion resistance than plastics such as polycarbonate...and superior solvent-based corrosion resistance to materials including ABS.

Right Reason #2: Chemical Resistance

- Stahlin's fiberglass provides chemical resistance that exceeds all other major non-metallic alternatives including PVC.

Right Reason #3: Impact Resistance

- Stahlin's fiberglass provides impact resistance that is greater than that of ABS and PVC.

Right Reason #4: Physical Strength

- Stahlin's fiberglass provides relative physical strength that exceeds ABS and PVC.

Right Reason #5: UV Resistance

- Stahlin's fiberglass is excellent with inhibitors and colors, surpassing the UV resistance performance of ABS and polycarbonates.

Impact Resistance
& Physical Strength
Corrosion Resistance
Chemical Resistance
UV Resistance

It's no wonder that DiamondShield can meet or exceed these many industry and governmental standards:

DiamondShield Industry Standards - All Sizes & Variations

UL/cUL 50/508	File E64358	Type 1, 3, 3s, 12, 13, 4X
NEMA Std. 250	N/A	Type 1, 3, 3s, 12, 13, 4X

STAHLIN® FIBERGLASS VERSUS METALLIC

Why Fiberglass Instead of Metallics?

Right Reason #1: Corrosion & Chemical Resistance

- Stahlin's fiberglass provides excellent corrosion and chemical resistance compared to metallics such as aluminum and painted or galvanized steel...and is very comparable to that of stainless steel. With fiberglass, enclosure maintenance is virtually eliminated.

Right Reason #2: Electrical Insulation

- Stahlin's fiberglass provides optimal dielectric strength as an electrical insulator versus the electrical conductivity of all metals.

Right Reason #3: Cost Savings

- Stahlin's fiberglass is significantly more cost effective than stainless steel and is very competitive with other metallics.

Right Reason #4: Ease-Of-Customizing

- Stahlin's fiberglass is extremely easy to drill, punch and cut compared to all metals.

Right Reason #5: Ease-Of-Handling

- Stahlin's fiberglass enclosures are lightweight and easy to handle compared to metal enclosures.

Need Factory Modifications? No Problem!

ModRight™

DiamondShield™ Is Part Of Stahlin's **ModRight™** Enclosure Modification Program!

ModRight™ offers you the opportunity to benefit from Stahlin's inhouse capabilities for achieving accurate, cost-effective enclosure modifications.

The program provides diverse choices for factory customizing of enclosures including cutouts, holes, windows, vents, countersinking, latches & locks, and non-standard sizing. ModRight also showcases Stahlin's computer-controlled manufacturing systems, panel management expertise, custom molding options, and specialty areas such as EMI & RFI shielding. Through the ModRight program, Stahlin offers more than 20 standard colors and the opportunity to computer match any custom supplied color sample. Graphic interfaces including silk-screening and decals are also available.

Why should enclosure users consider a factory-based modification program such as ModRight instead of doing their own modifications?

Our automated factory exceeds even the most elaborate field modification capabilities. We have made extensive investments in sophisticated computer-controlled equipment all for the purpose of ensuring consistency and accuracy in modifications. With factory-performed modifications we assume all responsibility for jobs done right and delivered to customers ready to use out-of-the-box.

Enclosure Specific Modifications

Custom Molded Colors

A key support to Stahlin's ModRight™ program is the value added feature of CostRight which provides website accessibility, including modifiable engineered drawings and quick cost quotations through the company's website at: **www.stahlin.com**
